Subject: Access to Flint data portal

Hey Regan, I hope this email finds you well. It has been a while since we last connected.

We continue to plug away on our modeling effort. We have demand data for all years 2011-2017 that has been assigned to nodes within the model we received from Arcadis. However, we are currently relying on the pump schedules that were used when calibrating the model (2 weeks in Oct. 2016 I believe). We realize this has changed overtime and would like to model conditions before and after this calibration. To do this, we need access to SCADA data.

With meeting with Rob Bincsik (cc'd) on Monday he indicated you (USEPA?) manages access to this information and he would contact you to request we obtain access. I am happy to provide the non-disclosure agreement we have with the city that affords us access to this data.

Also, it would be great to share with you where we are at and get any feedback you can provide. Is there a time we could do a quick conference call?

Thanks,
Shawn
